ABSTRACT / ZUSAMMENFASSUNG / ABREGE

03021468.8

In an electric power steering system, a second bevel gear (4) is allowed to move toward a first bevel gear (2) and is biased by a biasing member (7) toward the first bevel gear (2) thereby to be moved toward the first bevel gear as following the wearing away of these bevel gears.

The rack housing comprises a first housing (H2a) for supporting one end of the rotary element (5) and a second housing (H2b) for supporting the other end of the rotary element (5). A housing adjuster (10) provides for adjustment of the relative axial position of the first and second housings.
